BASIC PRACTICAL SKILLS EXAMINATION REPORT

Skill sheet #

IFBE-13

Certification title

**Industrial Fire Brigade
Basic Advance Exterior Member
SKILL REQUIREMENTS – DEPLOYING A ROOF
LADDER**

Applicant Information

Candidate name

DFS ID #

Course #

Evaluation

**Standard:
NFPA 1081, Chapter
5.3.11 (B)
2018 Edition**

Task

While wearing PPE, the brigade member will safely place a roof ladder.

Conditions and Outcome

The brigade member shall be provided with a roof ladder and personal protective equipment. The brigade member shall demonstrate the ability to safely place a roof ladder.

Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
1	Carry the roof ladder to the base of the climbing ladder that is already in place to provide access to the roofline.						
2	Place the butt end of the roof ladder on the ground, and rotate the hooks of the roof ladder to the open position.						
3	Raise and lean the roof ladder against one beam of the other ladder with the hooks oriented outward, away from you. Climb the lower climbing ladder until you reach the midpoint of the roof ladder that is positioned next to you, then slip one shoulder between two rungs of the roof ladder, and shoulder the roof ladder.						
4	Climb to the roofline of the structure, carrying the roof ladder on one shoulder. Secure yourself to the ladder.						
5	Place the roof ladder on the roof surface with hooks down. Push the ladder up toward the peak of the roof with a hand-over-hand motion.						
6	Once the hooks have passed the peak, pull back on the roof ladder to set the hooks, and check that they are secure. To remove a roof ladder from the roof, reverse the process just described. After releasing the hooks from the peak, it may be necessary to turn the ladder on one of its beams or turn it so the hooks are pointing up to slide the ladder down the roof without catching the hooks on the roofing material. Carrying a roof ladder in this manner requires strength and practice.						
Final Test Result for Entire Task
