Evaluation

**Standard:
NFPA 1081,
Chapter 5.3.9 (B)
5.3.10, (B)
2018 Edition**

Task
While wearing PPE, the brigade member will Extinguish a Class C fire with a multipurpose dry-chemical fire extinguisher.

Conditions and Outcome
The brigade member shall be provided with a choice of multipurpose dry-chemical fire extinguishers, carbon dioxide extinguishers, pressure water extinguishers, pike pole, and the following personal protective equipment (PPE): boots, pants, coat, hood, gloves, helmet, SCBA, and face piece. The candidate shall be able to choose the correct extinguisher and properly extinguish a simulated Class C fire with a multipurpose dry- chemical fire extinguisher.

Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
1	Size up the fire to determine whether a multipurpose dry-chemical fire extinguisher is safe and effective for this fire. Ensure the fire extinguisher is large enough to be safe and effective. Ensure your safety. Make sure you have an exit route from the fire. Do not turn your back on a fire and secure the power to the equipment.						
2	Remove the hose and nozzle. Quickly check the pressure gauge to verify that the fire extinguisher is adequately charged.						
3	Pull the pin to release the fire extinguisher control valve. Depending on the size of the fire and fire extinguisher, you must be within 5 to 45 ft (2 to 14 m) of the fire to be effective.						
4	Aim the nozzle, and sweep the dry-chemical discharge at the base of the flames. Coat the burning equipment with the dry chemical.						
5	Overhaul the fire; take steps to prevent rekindling, break apart tightly packed fuel, and summon additional help if needed.						
6	The brigade member is to identify the correct procedure for restoration of all used equipment per the policy of the fire brigade and the agency of representation.
