Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
1	Don full PPE, including SCBA; enter the personnel accountability system; and work as a team. Perform size-up, and give an arrival report on the type of vehicle and conditions. Call for additional resources if needed. Ensure that apparatus is positioned uphill and upwind of the fire and that it protects the scene from traffic.						
2	Deploy an appropriate attack line (at least 1½ in. [38 mm] in diameter).						
3	Open the nozzle to purge air from the system, and make sure water is flowing. If using an adjustable nozzle, ensure that it is set to the proper nozzle pattern. Shut down the nozzle until you are in a position to apply water.						
4	Direct the crew to attack the fire in a safe manner. Attack from uphill and upwind of the fire and at a 45-degree angle, and extinguish any fire under the vehicle.						
5	Carefully approach the vehicle, and completely suppress the fire.						
6	Overhaul all areas of the vehicle, including the passenger compartment, engine compartment, and cargo area (trunk).						
7	Notify command when the fire is under control. Identify obvious signs of the origin and cause of the fire. Preserve any evidence of arson. Return the equipment and crew to service.						

8	Identify who is the safety spotter.
