BASIC PRACTICAL SKILLS EXAMINATION REPORT

Skill sheet #

**ARFF
12-3**

Certification title

**AIRPORT FIREFIGHTING & RESCUE 6TH
EDITION**

Applicant Information

Candidate name

DFS ID #

Course #

Evaluation

Standard:
NFPA 1003, 2015 Edition

4.2.2

Communicate an accurate situation report about an aircraft incident/accident to an incident commander using incident management system (IMS) protocol. *[NFPA® 1003, 4.2.2]*

Instructor Directions

1. This activity can be performed individually or in small groups. If groups are used, divide students as necessary.
2. Direct students to the scenario provided in the Student Worksheet.
3. Explain to students they are to draft an accurate situation report for this scenario that includes vital information the Incident Commander would need to know in order to coordinate further response.
4. Answer any questions that the students may have about communicating accurate critical incident or accident information to the Incident Commander or using incident management system (IMS) protocols.
5. When individuals or groups are finished, have students present their situation report to the class or a small group of students.

| Number | Task Steps | First Test | | Retest #1 | | Retest #2 | |
|--------|------------|------------|------|-----------|------|-----------|------|
| | | Pass | Fail | Pass | Fail | Pass | Fail |
| 1 | | | | | | | |
| 2 | | | | | | | |
| 3 | | | | | | | |
| 4 | | | | | | | |
| 5 | | | | | | | |
| 6 | | | | | | | |

| | | | | | | | |
|-----------------------------------|--|--|--|--|--|--|--|
| 7 | | | | | | | |
| Final Test Result for Entire Task | | | | | | | |

Directions

- 1. Read the aircraft accident scenario below, which is a continuation of **Learning Activity 12-1 and 12-2**.
- 2. Based on the considerations in the scenario, draft an accurate situation report that includes vital information the Incident Commander would need to know in order to coordinate further response.

Scenario

At 6:10 a.m., you and a four-member ARFF team arrive at the site of a small aircraft downed just outside your airport in a swampy landscape of soft, wet terrain. Weather conditions are hot and humid. You immediately notice that one victim has self-evacuated from the accident and is walking along the perimeter of the swamp. The aircraft, a Cessna 414, is partially submerged in the water. Leaking fuel is immediately visible on the surface of the water. You notice that the aircraft has crash-landed into several trees. Overhanging branches are blocking access to the interior cabin. Although flames cannot be seen from the outside of the aircraft, plumes of smoke are rising from the engine. As you approach the aircraft, you note that one of the propellers is still rotating slowly.
